Skills

- HTML, CSS, JavaScript, TypeScript, Next.js, Node.js, NestJS
- PostgreSQL, MySQL, JWT, Docker, Turborepo, Drizzle ORM, MikroORM, Unit Tests
- Microservices | Distributed Systems | Frontend | Backend | Full-Stack | Portuguese, English – *All professional proficiency or above*

Experience

Backend Developer

Ninja

Brazil 08/2025 – 09/2025

- Selected among 60 candidates, ranking 2nd place, for a startup program designed to give unemployed individuals their first professional opportunity in tech.

Developed the backend of a forum-style web application with live chat functionality, using Java, JavaScript, CSS, and HTML.

Systems Analyst & Developer (Intern)

B2ML

Brazil 01/2026 – Current

- Built and maintained [anjoacolhedor.com.br](#), a WordPress/Elementor website for a nonprofit foundation, handling both development and ongoing site maintenance.
- Maintain and evolve the Timer API, an internal system tracking project allocation, team member workload, and time spent across B2ML's client engagements.
- Developed a form analysis and data-processing system for a **Banco do Brasil**-related initiative ([progeinfra.com.br](#)).
- Currently leading the re-architecture of the Timer API into **Plataforma B2ML**, a modular monolith platform spanning multiple business domains (**timer, client, user, reporting**), including remediation of critical security vulnerabilities such as access-control gaps and cross-tenant data isolation issues.
- Designed and built the company's corporate Skills Taxonomy, a structured framework mapping technical and soft-skill categories (Frontend, Backend, Database, DevOps, Testing, Observability, Architecture, Engineering Practices, Soft Skills) with a nine-block classification schema, used to support HR, recruitment, PMO, commercial pre-sales, and career-planning processes

Projects

SuperPão

[Github](#)

- Designed and built a production-ready **SaaS boilerplate** for bakery management (**inventory, production, purchasing, and product control**), architected as a monorepo.
- **Backend:** NestJS, MikroORM, PostgreSQL, JWT authentication with refresh tokens, RBAC, and audit logging. **Frontend:** Next.js, React, TypeScript, Tailwind CSS, TanStack Query, React Hook Form, Zod.
- Infrastructure: Docker, Docker Compose, Turborepo, pnpm. Deployed at [superpao.vercel.app](#)

AI Agent & Skills System for Claude Code + Kiro IDE

[Github](#)

- Built a system of 19 specialized AI agents and 21 reusable skills/commands for Claude Code and Kiro IDE, covering planning, code review, debugging, security auditing, architecture decisions, and DevOps workflows.
- **Standardized team conventions and automation hooks (pre-commit checks, dependency audits, test coverage gates)** to increase development consistency and velocity across projects.

Education

- Information Systems
- Currently enrolled – 6th semester

Certifications

- Introduction to Agent Skills — Anthropic
- TypeScript: Building an API with Type Safety — Alura
- Prompt Engineering — Alura
- Artificial Intelligence — Alura
- Computational Thinking — Alura
- Introduction to JavaScript — Udemy
